

New Deadline – April 30

Win a Free Solar Panel for Acton

Funding for the solar panel provided by the Massachusetts Technology Collaborative

If 150 Acton households or businesses make a tax-deductible contribution* to the nonprofit New England Wind Fund by April 30, state funding will provide and install a 2,000-watt solar panel (worth \$22,000) on a town building.

This exciting project will demonstrate the utility of a solar panel right here in our town, save the town money every year, and reduce emissions of greenhouse gases. The project will also offer Acton-Boxborough students real-life access to the use of renewable energy, and an opportunity to extend their experience of science curriculum.

For more information or to contribute, go to: www.ActonClimate.org, or call Matt Liebman at 978.635.9652, or contact New England Wind Fund at 800.287.3950.

*** Qualifying contribution:
a one-time donation
of \$100 or a monthly
donation of at least \$5.**
